

Advanced Hospice Palliative Care Education – Sault Ste Marie ON & Algoma Winter Session

AHPCE Program Snapshot:

This program is specifically designed to meet the learning aspirations and needs of support workers who care for someone with a life threatening illness and his or her family.

The content of this course focuses on the three foundational concepts of Hospice Palliative Care, which are woven throughout the program:

1. Effective group function
2. Effective communication
3. Ability to facilitate change

The Fundamentals of Palliative Care Resource Guide will be used throughout this course as a resource for the learner

Course features:

- A comprehensive learning and development strategy focused on the learner
- Further development of palliative care knowledge through a case-based / learning-through-dialogue approach in the classroom
- An interactive, multimedia approach based on adult learning concepts and best practices
- 30 hours of in-class education

Attendance at the **first class is mandatory** to continue the course

Attendance at all classes is required to receive a certificate of completion

Missed classes sessions 2 – 10 can be made up at future sessions

In-Person Case Based Learning Sessions:

Week	Time	Location	Topic
Week 1	1800-2100	TBD	In-person Case Based Learning
